<https://thienchanh411.github.io/chanhvo-portfolio/> | <https://github.com/thienchanh411>

- 1+ year end-to-end experience in Agile web development from BA, designing solution and UX/UI, planning, implementing, testing using in React, Node.js, JavaScript, Java, HTML/CSS, MongoDB, MySQL, SQL server, Git, OAuth, JWT, secured APIs and other fundamental security principles, deployment in Heroku, VPS Hostinger.
- Very fast learner, lifelong learning mindset. Great challenge taker and change adaptability. Strong self-initiative, prioritization, time management, self-motivated skill. Great analytic and problem-solving skill, strong experience in working directly to client with end-user experiences satisfaction mindset. Great supportive team player as well individual working, great communication skill.

SKILLS

- **Programming/Query languages:** JavaScript, Java, HTML5/CSS, PHP, C#
- **Frameworks/Libraries:** Node.js, React.js, Bootstrap, jQuery
- **Databases:** MySQL, SQL server, SQLite, MongoDB, Firebase
- **Tools:** Android studio, UX design (Figma, Justinmind), Version control (GitHub), Microsoft Office
- **Soft Skills:** problem-solving, troubleshooting, Agile methodology, quick learner, teamwork, communication

WORK EXPERIENCE

KidTalk | Freelancer Software developer

BC, Canada | Jan 2023 - now

- Developed a full-stack web application for online courses, facilitating video uploads and streaming, as well as ensuring the secure handling of books and meeting functions. Successfully tackled the complexities of evolving requirements and global data transmission, prioritizing both speed and security
- Based on the provided Figma design by client, using React, jQuery, Bootstrap, with great attention to detail skill, created successfully the screen-sizes responsive and user-friendly UI, enhanced user experience.
- Gathered and analyzed client requirements, designed efficient normalization database can align 100% the requirements and flexibility for new requirements
- Used MongoDB, Express.js, Node.js, implemented efficient backend with sufficient APIs for complex data retrieval with validation, resulting 100% data accuracy and integrity throughout manipulation processes.
- Implemented Zoom API, deployed AWS S3, CloudFront for core functions of the app, resulting in convenient and secured book/join online meeting, upload/streaming video files, enhanced user experience.
- Achievement: Received the complete satisfaction from client about UI implementation, the correct responses to the requests from users, and agreed to move to next stage for the pilot of the project

Netigant | Freelancer Software developer

SF, US | May 2023 - now

- Used HTML, CSS, Bootstrap, JQUERY and focus on detail skill, implemented responsive user-friendly UI.
- Analyzed client needs, used MySQL and PHP, designed efficient database aligned 100% requirements. Implemented sufficient APIs with optimal SQL queries to manipulate accurately complicated data, achieved 100% data accuracy during transaction
- Assisted to document data engineering processes, system architecture, and technical specifications.

DataPot | Software developer Intern

Vietnam | Jan 2023 - Apr 2023

- Based on Figma design, analyzed user needs, using HTML, CSS, JQUERY, implemented successfully screen responsive user-friendly UI, enhanced user experience.
- Analyzed client needs to design optimal database in SQL Server can aligned 100% business requirements.
- Used Java, implemented sufficient APIs with data validation, OAuth and error handling, responded correctly 100% user request and ensure 100% data integrity.

EDUCATION

Douglas College, BC, Canada | Computer and Information System Post-baccalaureate diploma

- GPA: 3.33
- Relevant courses: Software Engineer, Data structures and Algorithms, Database, System design
